**Subject:** Castle Valley Stone Exploration

The status of this site (E0150072) is listed as proposed, but we approved it March 17, 2007. The exploration has been consumed by the Reef small mine (S0150094), so we should close the exploration project. I don't think we need to write the operator, but it would probably be best if this e mail went to the exploration file to explain why we closed it.

Could you make these changes in the database and print this message for the file? Thank you.
